

Energy Saving ZR Roots Vacuum Pump Easy Installation And Maintenance For Sensitive Operations

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Aipu
- Model Number: ZR
- Minimum Order Quantity: 1
- Price: Negotiable
- Packaging Details: Export Standard Packaging
- Payment Terms: T/T, L/C

Product Specification

- Flow Range: 317.9-1396m³/min
- Material: HT250
- Models: ZR
- Vacuum Degree: -13.3~-53.3kPa
- Highlight: roots vacuum pump easy installation, maintenance roots type pump, maintenance roots vacuum pump

Energy-Saving ZR Vacuum Pump Easy Installation and Maintenance for Sensitive Operations

Product Features

The product features of ZR vacuum pump include small size, light weight, low noise, high efficiency and energy saving, easy installation and maintenance, smooth operation, safety and reliability.

The design of ZR vacuum pump focuses on high efficiency and energy conservation. By optimizing the structure and materials, it operates more smoothly and reduces energy consumption. At the same time, its installation and maintenance process has been simplified, providing convenience for users. In addition, the safety and reliability of the vacuum pump have been improved by using high-quality materials and precise design, ensuring its stable operation under various working conditions. These characteristics make ZR vacuum pumps suitable for multiple fields, including but not limited to metallurgy, machinery, electronics, chemical, light industry, petroleum, pharmaceuticals, and other production and research departments. In addition, ZR vacuum pumps also have the characteristics of small size, strong strength, and durability, which make them an ideal choice for multiple fields, including but not limited to medical facilities, environmental protection, chemical processes, laboratories, food engineering, household applications, and more. It adopts aluminum die-casting and anti-corrosion coating, which is lightweight and beautiful, has a wide range of applications, high corrosion resistance, and can meet the requirements of various working environments.

In summary, ZR vacuum pump has become an ideal choice in multiple industries due to its high efficiency, energy saving, easy installation and maintenance, stable and safe operation, and wide range of application fields.

Scope of application

It is suitable for sewage treatment industry, petrochemical industry, food and industry, textile industry, metallurgy industry, cement and construction materials industry, printing and dyeing industry and other industries.

Market Distribution

We have 42 offices throughout the country, in addition to Taiwan Province, 33 provinces in the country's administrative regions have a sound sales and service network. We can provide you with pre-sale, in-sale and after-sales service in a timely and convenient manner, understand your needs, and constantly improve the service and quality system while meeting the customized needs of customers.

High Performance Aerodynamic Design Methodology for Wide Service Conditions

By studying the influence of impeller and volute flow on efficiency and working stability, the R&D team proposed a flow control method and a pneumatic optimization design method to improve the performance of the main engine, which greatly improved the efficiency of the main engine.

Manufacturing & Equipment Base

has built laboratories, R& D buildings, processing workshops, etc., with internationally advanced and China leading high-precision processing equipment.

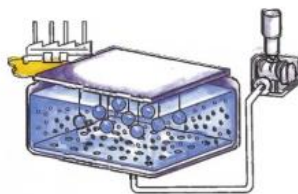

Examples of uses

水泡浴 Foaming in Bath

燃烧炉 Combustion a Fireplace

电镀槽搅拌 Stirring in Plated Vessel

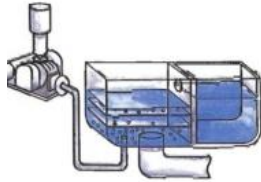

■ 公寓大楼的污水处理 (曝气)
Waste water Aeration in Condominiums

■ 工厂废水和畜产废水处理 (曝气)
Waste Water Aeration for Shop and Livestock Industries

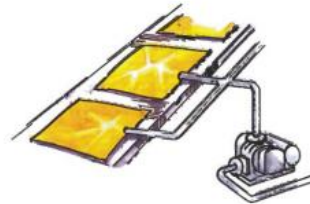

■ 养鱼用 Fish Care

■ 冲洗 Back Washing

■ 粉体输送 (水泥、饲料、小片状物)
Transport of Particles

■ 食品真空包装
Vacuum Pack for Foods
