

## Industrial Multi Stage Centrifugal Vacuum Pump Cast Iron For And Effective Vacuuming

### Our Product Introduction

for more products please visit us on [aipukqdl.com](http://aipukqdl.com)

#### Basic Information

- Place of Origin: China
- Brand Name: Aipu
- Certification: CE CCC SABS TUV RoHS
- Price: Negotiable
- Packaging Details: Standard Export Package
- Delivery Time: 6-8 workdays

#### Product Specification

- Specification: C
- Material: Cast Iron
- Type: Centrifugal
- Stage: Multi-stage
- Vacuum Degree: -20~-50kpa
- Highlight: industrial multi stage centrifugal vacuum pump,  
multi stage centrifugal vacuum pump cast iron,  
industrial multistage centrifugal pump

## Product Description

### Product Description:

The vacuum degree of this device is -20~-50kPa, which can generate strong suction capacity and is very suitable for various applications. Multi stage centrifugal vacuum pumps are highly suitable for use in industrial environments such as chemical plants, refineries, and other manufacturing facilities. It is also very suitable for medical facilities and laboratories that require high levels of cleanliness and hygiene. The multi-stage centrifugal vacuum pump has a specification of C-shaped casting, making it an ideal choice for wide applications. It is also compatible with 50Hz and 60Hz frequencies, making it a versatile device that can be used in various settings. The multi-stage centrifugal vacuum pump is designed with multi-stage impellers to generate high pressure at low capacities. This device is highly suitable for applications that require high pressure and low capacity suction capabilities. The flow rate of this device is 20-1500m<sup>3</sup>/min, which can generate strong suction capacity and is very suitable for various applications. Overall, multi-stage centrifugal vacuum pumps are multifunctional and high-performance devices that are highly suitable for a wide range of industrial and medical applications. Whether you need a multi-stage centrifugal vacuum pump or a multi-stage suction pump, this equipment is the perfect choice for your needs.

### Features:

**Product Name:**Multi stage Centrifugal Vacuum Pump

**Material:** Cast Iron

**Specification:** C

**Frequency:** 50Hz/60Hz

**Inlet Diameter:** DN200-500mm

This product is a vacuum pump, also known as a multi-stage centrifugal vacuum pump. It has multi-stage impellers that help create a vacuum and is made of cast iron material. Its specification is C and its operating frequency is 50Hz/60Hz. Its inlet diameter is DN150-800mm.

### Technical Parameters:

Parameter	Value
Inlet Diameter	DN200-500mm
Outlet Diameter	DN200-400mm
Stage	Multi-stage
Application	Vacuum Pump
Flow Range	20-1500m <sup>3</sup> /min
Frequency	50Hz/60Hz
vacuum degree	-20~-50kPa
Material	Cast Iron

This multi-stage vacuum pump is a high-pressure multi-stage vacuum pump designed for various applications, such as industrial vacuum systems, suction, etc.

### Applications:

Multi stage centrifugal vacuum pumps are an ideal choice for widespread applications, making them a universal and useful tool in many industries. It can be used for vacuum packaging, vacuum drying, vacuum distillation, and many other applications. The pump is designed with multi-stage blowers, which can achieve high-pressure suction and efficient operation.

Aipu multi-stage centrifugal vacuum pump is a powerful and reliable tool that is very suitable for various scenarios. It is suitable for factories, laboratories, and other industrial environments that require high-pressure suction. The motor power of this pump is 11-1800kW, making it a sturdy and durable tool.

The outlet diameter of the pump is DN150-800mm, and the inlet diameter is DN150-600mm. This makes it easy to connect the pump to existing equipment, ensuring that you can start and run quickly and easily. Multi stage centrifugal vacuum pumps are an excellent choice for those who need powerful and efficient vacuum pumps capable of handling a wide range of applications.

In summary, the Aipu multi-stage centrifugal vacuum pump is a high-quality product designed to meet the needs of many industries. It is a universal and reliable tool that is durable and has a range of functions that make it easy to use and connect to existing devices.

Whether you need a vacuum pump for vacuum packaging, vacuum drying, or any other application, a multi-stage centrifugal vacuum pump is a good choice.

### Customization:

Our multi-stage centrifugal vacuum pump is equipped with Siemens motors, making it an ideal choice for vacuum pump applications. Its centrifugal design enables efficient performance and can operate at frequencies of 50Hz/60Hz.

The outlet diameter of the pump is DN150-600mm, and the packaging details are standard export packaging. The delivery time is 6-8 working days, and the price is negotiable.

We believe that Aipu can meet your needs for centrifugal blowers and vacuum pumps. Contact us immediately to learn more about customization options for this multi-stage centrifugal vacuum pump.

## Support and Services:

Multi stage centrifugal vacuum pump is an efficient and reliable product designed for a wide range of industrial applications. Our experienced team of engineers and technicians can provide technical support and services to ensure that your equipment achieves optimal performance. We provide a range of services, including installation, maintenance, repair, and optimization of centrifugal vacuum pumps. Our experts can also provide training and consultation to help you fully utilize the equipment. Contact us immediately to learn more about our technical support and services.

## Packing and Shipping:

Product Packaging:

**The multi-stage centrifugal vacuum pump will be safely packaged in a sturdy wooden box.**

**The wooden crate will be sealed for transportation to prevent any damage or tampering during the transportation process.**

**In the wooden box, the product will be wrapped with bubble wrap to provide additional protection.**

**All necessary accessories and user manual will be included in the package.**

Shipping:

**Multi stage centrifugal vacuum pumps will be shipped through reliable and trustworthy courier services.**

**The shipping cost will be calculated based on the destination and weight of the package.**

**Customers will be provided with a tracking number to monitor the progress of their shipment.**

**The estimated delivery time will depend on the destination and the courier service used, and will be communicated to the customer.**

## FAQ:

What is the brand name of this centrifugal vacuum pump?

The brand name of this centrifugal vacuum pump is Aipu.

Where is this centrifugal vacuum pump manufactured?

This centrifugal vacuum pump is manufactured in China.

What certifications does this centrifugal vacuum pump have?

This centrifugal vacuum pump has the following certifications: CE, CCC, SABS, TUV, RoHS.

What is the price of this centrifugal vacuum pump?

The price of this centrifugal vacuum pump is negotiable.

What are the packaging details and delivery time for this centrifugal vacuum pump?

The packaging details for this centrifugal vacuum pump is Standard Export Package and the delivery time is 6-8 workdays.
