Customizable Centrifugal Multistage Blowers DN150-800mm Inlet Diameter For Various Applications

Our Product Introduction

for more products please visit us on aipukqdl.com

Basic Information

- Place of Origin: China
- Brand Name: Aipu
- Certification: CE CCC SABS TUV RoHS
- Price: Negotiable
- Packaging Details: Standard Export Package
- Delivery Time: 6-8 workdays

Product Specification

- Stage: Multi-stage
- Type: Centrifugal
- Outlet Diameter: DN150-600mm
- Pressure: 19.6-137.2kpa
- Specification: C
- Inlet Diameter: DN150-800mm
- Highlight: Customizable centrifugal multistage blowers, Custom multistage centrifugal air blower, multistage centrifugal blower manufacturer

Product Description

Product Description:

The design of a multi-stage centrifugal blower can provide a powerful boost of 19.6-137.2kPa, making it an ideal choice for various applications. This centrifugal fan is very suitable for industries such as food processing, pharmaceuticals, and chemicals. It can handle various materials, including liquids, powders, and gases.

This centrifugal blower is renowned for its high-quality and reliable motor, ensuring efficient operation and minimal maintenance requirements. This centrifugal blower is easy to maintain, with simple components that can be easily replaced if needed.

The design of multi-stage centrifugal blowers is also easy to install and operate. It is equipped with a user-friendly interface that allows for easy control and monitoring of the performance of the fan. The fan is designed to be compact and easy to install in small spaces.

The weight of the multi-stage blower is 700kg, making it easy to move and transport. Its design is also energy-efficient, which means it consumes less energy compared to similar products. This makes it an ideal choice for companies looking to reduce energy consumption and operating costs.

In short, multi-stage centrifugal blowers are powerful and efficient machines that can handle a wide range of industrial applications. With its durable materials, high-quality motors, and easy-to-use interface, this fan is a reliable and cost-effective solution for companies seeking to improve productivity and reduce operating costs.

Features:

Product Name: Multi stage Centrifugal Blower

Inlet Diameter: DN150-800mm

Specification: C

Frequency: 50Hz

Stage: Multi-stage

Keywords: multi-stage blower, multi-stage centrifugal blower, C-series cast multi-stage centrifugal blower

Technical Parameters:

Product Name:	Multi stage centrifugal blower
Application:	Multi stage centrifugal fan
Specification:	C
Stage:	Multi-stage
Flow Range:	20-1500m³/min
Frequency:	50Hz
Boost:	19.6-137.2kPa
Inlet Diameter:	DN150-800mm

Applications:

Multi stage blowers are designed to handle high-pressure and high-capacity applications. It is commonly used in industries that require a large amount of air, such as wastewater treatment, chemical plants, and power plants. This fan is capable of handling different types of gases, making it a multifunctional product.

Multi stage blowers are also an excellent choice for the conveying industry. It is suitable for water treatment, wastewater treatment, biogas recovery vacuum dust removal, air knife drying, flotation and mineral processing, galvanizing process and electroplating, liquid and bath oxygenation, process gas transportation, papermaking and printing industry, air combustion (desulfurization, carbon black, blast furnace smelting, etc.). This product uses high-quality motor brands to ensure reliable and efficient performance. The outlet size of the fan is DN150-600mm, and the motor power is 11-1800kW, suitable for heavy-duty applications.

Aipu's multi-stage centrifugal fans are competitively priced and come with standard export packaging. The delivery time is very fast, with a lead time of 6-8 working days. This product is suitable for various occasions and scenarios, including industrial plants, factories, and manufacturing facilities.

In short, Aipu's multi-stage centrifugal blower is an excellent investment for industries that require high pressure and large capacity air. This product is made of sturdy materials and comes with certification to ensure its quality and safety.

Customization:

Support and Services:

Multi stage centrifugal blower products provide first-class technical support and services, including:

Expert troubleshooting and problem-solving assistance

Guidance on proper installation and usage

Regular maintenance and cleaning recommendations

Repairs and replacement parts as needed

Training and educational resources for optimal product use and performance

Packing and Shipping:

Product Packaging:

The multi-stage centrifugal blower is securely packaged in a sturdy wooden box.

There are foam pads around the fan to prevent damage during transportation.

Accessories and instruction manual are also included in the package.

Shipping:

The product will be shipped within 2-3 business days of placing the order.

We use reliable shipping carriers to ensure prompt and safe delivery.

Customers can track their shipment using the provided tracking number.

FAQ:

A: The brand name of the multi-stage centrifugal blower is Aipu.

Q: Where is the multi-stage centrifugal blower made?

A: The multi-stage centrifugal blower is made in China.

Q: What certifications does the multi-stage centrifugal blower have?

A: The multi-stage centrifugal blower has CE, CCC, SABS, TUV, and RoHS certifications.

Q: What is the price of the multi-stage centrifugal blower?

A: The price of the multi-stage centrifugal blower is negotiable.

Q: What are the packaging details and delivery time for the multi-stage centrifugal blower?

A: The packaging details for the multi-stage centrifugal blower are standard export package. The delivery time is 6-8 workdays.
