High Frequency Centrifugal Ventilator Fan Cast Iron 3600-2800000m³/H Total Pressure

Basic Information

- Place of Origin:
- Brand Name: Aipu
- Certification:
- Price: Negotiable
- Packaging Details: Standard Export Package

China

6-8 workdays

CE CCC SABS TUV RoHS

Delivery Time:

Product Specification

- Application: Industrial
 Total Pressure: 3600-2800000m³/h
 Warranty: 1 Year
 Temperature: Below 600°C
 Material: Cast Iron
 Highlight: high frequency centrifuge
 - ht: high frequency centrifugal ventilator, 2800000m³/h centrifugal fan, 2800000m³/h centrifugal ventilator

Product Description:

This ventilation fan is made of high-quality materials, ensuring durability and excellent resistance to corrosion. It can withstand harsh environmental conditions and can be used for various applications like ventilation, cooling, and drying in different industries. The Centrifugal Ventilator is an ideal choice for industrial applications where high airflows and high-pressure levels are required. It is a perfect solution for factories, warehouses, workshops, and other large industrial settings, where air quality and ventilation are essential. The fan is also suitable for HVAC systems in commercial buildings and other large facilities.

This industrial fan is designed with noise-reducing features, ensuring a noise level of only 60dB. It provides quiet operation while still delivering high airflow and pressure levels. The noise-reducing features make it ideal for use in environments where noise levels are regulated, such as hospitals, schools, and residential areas.

The Centrifugal Ventilator operates at 380V, making it compatible with most electrical systems used in industrial settings. It is easy to install and maintain, and it comes with a user manual that provides detailed instructions on how to operate and maintain it correctly. In conclusion, the Centrifugal Ventilator is a powerful, durable, and efficient industrial fan that is ideal for various industrial applications. Its high-pressure levels, noise-reducing features, and compatibility with electrical systems make it a top choice for factories, warehouses, workshops, and other large industrial settings. It is also suitable for use in commercial buildings and other large facilities where air quality and ventilation are essential.

Features:

Product Name: Centrifugal Ventilator Application: Industrial Temperature: Below 600°C Flow Range: 3600-2800000m³/h Material: cast iron Keywords: Centrifugal Blower Fan, High-Speed Centrifugal Blower, Centrifugal Fan

Technical Parameters:

Product Name	Industrial Air Blower
Air Flow	3600-2800000m3/h
Total pressure	300-30000Pa
Voltage	380V
Application	Industrial
Temperature	Below 600°C
Product Type	Centrifugal ventilation fan

Applications:

This ventilation fan has a durable structure and reliable performance, and has been certified by CE, CCC, SABS, TUV, and RoHS. This certification ensures that it meets the highest quality and safety standards, giving you peace of mind as you are using high-quality products.

The cyclone blower fan is designed to provide powerful airflow while minimizing noise levels, with a noise level of only 60dB. This makes it very suitable for use in environments where noise levels need to be kept to a minimum, such as hospitals, schools, and other public places.

Radial blade fans are also very efficient, which means they can quickly and easily move large amounts of air, making them an ideal choice for large industrial spaces where ventilation is important.

Whether you are looking for industrial centrifugal fans for use in factories or warehouses, or need high-quality blowers for specific applications, Aipu centrifugal fans are the perfect choice. With its competitive price, standard export packaging, and fast delivery time of only 6-8 working days, it is an excellent investment for any business.

With a one-year warranty period, you can be confident that you are making a wise investment in a high-quality product that will provide reliable performance in the coming years.

Customization:

The delivery time is 6-8 working days, so you can rest assured that you will soon receive the high-pressure blower, cyclone blower, or high-speed centrifugal blower. Our ventilation fans are designed to withstand temperatures below 800 ° C and can provide air flow rates of up to 3600-2800000 m3/h. Their full voltage range is 300-30000pa, and the working voltage is 380V.

Support and Services:

- Expert installation and commissioning services to ensure optimal performance and efficiency of the ventilator

- Comprehensive product training to equip your maintenance team with the knowledge and skills to operate and maintain the ventilator

- Ongoing technical support to address any issues or concerns you may have with the product
- Preventative maintenance services to keep your ventilator running smoothly and minimize downtime
- Replacement parts and repair services to ensure the longevity of your ventilator

Our team of experienced technicians is dedicated to providing you with the highest level of support and service to ensure your Centrifugal Ventilator operates at peak performance and efficiency.

Packing and Shipping:

Product Packaging:

The centrifugal ventilator will be securely packed in a sturdy cardboard box.

The box will be labeled with the product name, product code, and handling instructions.

The product will be cushioned with foam and other protective materials to prevent damage during transportation.

Shipping:

The product will be shipped via a trusted courier service.

Shipping fees may apply and will be added to the total cost of the product.

The estimated delivery time will be provided to the customer upon purchase.

The customer will receive a tracking number to track the status of their shipment.

FAQ:

- Q1. What is the brand name of this centrifugal ventilator?
- A1. The brand name of this product is Aipu.
- Q2. Where is this centrifugal ventilator manufactured?
- A2. This product is manufactured in China.
- Q3. What certifications does this centrifugal ventilator have?
- A3. This product has CE, CCC, SABS, TUV, and RoHS certifications.
- Q4. What is the price of this centrifugal ventilator?
- A4. The price of this product is negotiable.
- Q5. How is this centrifugal ventilator packaged and what is the delivery time?
- A5. This product is packaged in a standard export package and the delivery time is 6-8 workdays.
