

380V Stainless Steel Centrifugal Air Blower / Centrifugal Fan With 300Pa-30000Pa Boost

Basic Information

Place of Origin: ChinaBrand Name: Aipu

Certification: CE CCC SABS TUV RoHS

• Price: Negotiable

Packaging Details: Standard Export Package

• Delivery Time: 6-8 workdays

Product Specification

• Total Pressure: 300-30000Pa

• Voltage: 380V

Material: Cast Iron

• Flow Range: 3600-2800000m³/min

• Dust Content: ≤150g/Nm³

• Highlight: stainless steel centrifugal air blower,

380v centrifugal fan, 380v centrifugal air blower

Product Description:

Our centrifugal fan can generate a boost of 300-30000 Pa, making it a powerful tool to meet your ventilation needs. This centrifugal fan is very suitable for large spaces such as factories, warehouses, or any other industrial or commercial environment that requires a large amount of airflow.

Our centrifugal fans continue to innovate on the basis of traditional fans and have developed into various high-efficiency and energy-saving centrifugal fans, as well as new series of centrifugal fans. To meet the different working conditions and usage needs of customers, our company adopts the concept of "tailor-made" and combines the impeller "three element flow" technology to provide users with efficient and energy-saving products. The use of advanced software for strength verification and flow field analysis ensures the reliability and stability of centrifugal fans with high efficiency, low noise, and minimal vibration. It introduces advanced design concepts, flexible design and production, wide coverage of operating parameters, and significant advantages compared to other products. It is widely used in industries such as power plants, coking, steel, waste incineration, hazardous waste treatment, and petrochemicals. According to the characteristics of the conveying medium, advanced anti-corrosion and wear-resistant measures are adopted, and various sealing methods such as packing seal, labyrinth seal, carbon ring seal, water seal, etc. are flexibly selected to meet the requirements of various industries. By optimizing the selection design, we have provided technological improvements, optimized the performance of the fan, and improved the compatibility and economy of fan operation. Tailored according to customer needs, providing high-quality products and services to help enterprises achieve low-carbon goals and sustainable development.

We [brand name] support the quality and durability of our products. That's why we offer a one-year warranty for our industrial centrifugal fans, so you can purchase with confidence. Our customer service team can help you solve any problems or concerns.

Features:

Product Name: Centrifugal Ventilator

Boost: 300-30000Pa

Features:

High speed centrifugal fan Centrifugal ventilation fan

ventilator

Technical Parameters:

Product	Centrifugal Ventilator
Application	Industrial
Material	cast iron
Boost	300-30000Pa
Voltage	380V
Flow Range	3600-2800000m³/min
Warranty	1 Year

Applications:

Our centrifugal fans are suitable for environments with temperatures below 600 ° C. They are designed to provide high-speed and efficient airflow with a flow range of 3600-280000 m ³/min.

Our centrifugal fans are highly suitable for ventilation in various industrial applications, including factories, warehouses, and other large industrial spaces. They can also be used for air conditioning and heating in commercial buildings, such as shopping centers, hotels, and office buildings.

Our centrifugal fans are durable, with a warranty period of 1 year. The durable design ensures long-term reliable performance. Their prices are also very competitive, and negotiable prices make them widely accepted by customers.

Our centrifugal fans come in standard export packaging and can be delivered within 6-8 working days. They are easy to install and can be used in various scenarios, making them a universal and reliable choice for any industrial or commercial application.

If you are looking for a centrifugal fan that can provide efficient airflow and reliable performance, then Aipu is your best choice. Contact us immediately to learn more about our centrifugal fan products and how they can benefit your business.

Customization:

The centrifugal fan adopts a "customized" design, with a working voltage of 380V, providing a boost of 300-30000Pa, and can withstand temperatures below 600 ° C. Contact me to start customizing your centrifugal fan to meet your specific industrial ventilation needs.

Support and Services:

The Centrifugal Ventilator from our company is a high-quality product that is designed to provide effective ventilation in a variety of applications. Our technical support and services are available to ensure that our customers are able to get the most out of their Centrifugal Ventilator.

We offer a range of product support services, including:

Installation support

Product training and education

Regular maintenance and servicing

Repairs and replacement parts

Our team of experienced technicians is available to provide assistance with any technical issues that may arise with your Centrifugal Ventilator. We are committed to ensuring the satisfaction of our customers, and we work hard to provide timely and effective support

If you have any questions or concerns about your Centrifugal Ventilator, please do not hesitate to contact our technical support team.

Packing and Shipping:

Product Packaging:

The centrifugal ventilator will be carefully packaged in a sturdy cardboard box.

All components will be wrapped in protective foam to prevent damage during transportation.

The box will be labeled with the product name, model number, and handling instructions. Shipping:

We offer worldwide shipping through our trusted carrier partners.

Shipping costs will be calculated based on the destination and weight of the package.

Customers will receive a tracking number once the package has been shipped.

Delivery times may vary depending on the destination and shipping method selected.

FAQ:

- Q1: What is the brand of this centrifugal fan?
- A1: The brand of this centrifugal fan is Aipu.
- Q2: Where was this centrifugal fan manufactured?
- A2: This centrifugal fan is made in China.
- Q3: What are the certifications for this centrifugal fan?
- A3: This centrifugal fan has passed CE, CCC, SABS, TUV, and RoHS certifications.
- Q4: What is the price of this centrifugal fan?
- A4: The price of this centrifugal fan can be negotiated.
- Q5: What are the packaging details and delivery time?
- A5: The packaging details are standard export packaging, and the delivery time is 6-8 working days.
