

Industrial Centrifugal Ventilator for Improved Air Circulation and Comfort in Large-Scale Facilities

Our Product Introduction

for more products please visit us on aipukqdl.com

Basic Information

- Place of Origin: China
- Brand Name: Aipu
- Certification: CE CCC SABS TUV RoHS
- Price: Negotiable
- Packaging Details: Standard Export Package
- Delivery Time: 6-8 workdays

Product Specification

- Power Supply: AC 380V, 50-60Hz
- Place: China
- Flow Range: 3600-2800000m³/h
- Total Pressure: 300-30000Pa
- Temperature: ≤600°C
- Dust Content: ≤150g/Nm³
- Material: Q235

Product Description

Product Description:

Centrifugal Ventilator is a key product developed by our company. In recent years, we have continuously innovated on the basis of conventional fans in China, and have derived various high-efficiency energy-saving fans and new series of fans. To meet the different working conditions and usage needs of customers, our company adopts the concept of "tailor-made" and combines the impeller "three element flow" technology to provide users with efficient and energy-saving products. Utilizing advanced software for strength verification and flow field analysis, the fan operates with high efficiency, low noise, and minimal vibration, ensuring the reliability and stability of the fan. Introducing foreign design concepts, flexible design and production, and wide coverage of operating parameters, it has obvious advantages over domestic products and is widely used in industries such as power plants, coking, steel, waste incineration, hazardous waste treatment, and petrochemicals. Based on the characteristics of the conveying medium, advanced anti-corrosion and wear-resistant measures are adopted, and various sealing methods such as packing seal, labyrinth seal, carbon ring seal, and water seal are flexibly selected to meet the requirements of various industries. By optimizing the selection design, we provide technical improvements, optimize the performance of the fan, and improve the compatibility and economy of fan operation. Tailored according to customer needs, providing high-quality products and services to help enterprises achieve low-carbon goals and sustainable development.

Centrifugal Fan (Tailor Made):

Lean Manufacturing

Less Leakage

High wear resistance

High anti-corrosion

Flexible layout

Easy to transport

Timely after-sales service

Colleges and universities cooperation

Continuous innovation

Quality assurance

Perfect after-sales service

Originated in Germany

Customized

High efficiency and energy saving

Stable performance

Technical Parameters:

Flow Range	3600-2800000m ³ /h
Noise Level	60dB
Voltage	380V
Temperature	Below 600°C
Model	Centrifugal Ventilator
Material	Q235
Application	Industrial

Applications:

With a flow range of 3600-2800000m³/h, this radial blade fan is perfect for use in various industrial settings. It is suitable for use in factories, warehouses, and other large industrial spaces. It is also capable of operating in temperatures below 800°C, making it ideal for use in a wide range of applications.

The Aipu Centrifugal Ventilator is certified by CE, CCC, SABS, TUV, and RoHS, ensuring that it meets all the necessary safety and quality standards. It giving you peace of mind and assurance that you are purchasing a high-quality product.

The Aipu Centrifugal Ventilator is available at a negotiable price and comes with standard export packaging. It can be delivered within 6-8 workdays, making it a convenient option for those in need of a reliable and efficient centrifugal fan.

The Centrifugal Fan is ideal for use in a variety of industrial applications, including ventilation, air conditioning, and dust collection. It is capable of handling large volumes of air and can be used to transport air over long distances.

Whether you need a centrifugal fan for a large factory or a small workshop, the Aipu Centrifugal Ventilator is the perfect solution. With its durable construction, high-quality components, and reliable performance, it is sure to meet all your industrial ventilation needs.

Customization:

This product is customizable to fit specific needs. We offer product customization services for our customers. Our Radial Blade Fan can be modified to suit the needs of different industries. We offer High-Speed Centrifugal Blower customization services, which can help increase the pressure levels. We also provide High-Pressure Blower customization services to help improve the performance of the product.

Our delivery time is 6-8 workdays, and we ensure that the product meets the customer's specifications. Contact us today to discuss your

customization requirements.

Support and Services:

The Air Suspension Oxygenator product is designed to provide oxygenation therapy to patients with respiratory problems. Our technical support and services for this product include:

- Assistance with installation and setup of the Air Suspension Oxygenator
- Troubleshooting and diagnosing technical issues with the product
- Providing replacement parts and accessories as needed
- Offering training and education on the proper use and maintenance of the product
- Conducting regular maintenance and check-ups to ensure optimal performance of the product

Our team of experienced technicians is available to assist you with any questions or concerns you may have about the Air Suspension Oxygenator. Contact us for further assistance.

Support and Services:

Our Centrifugal Ventilator product comes with comprehensive technical support and services to ensure maximum performance and longevity. Our team of experienced technicians is available to assist you with any product-related questions or concerns you may have. We also offer maintenance and repair services to keep your ventilator operating at optimal levels. In addition, we provide training programs to ensure that your staff is well-equipped to operate and maintain the product. Our goal is to provide you with reliable and efficient ventilation solutions that meet your specific needs.

Packing and Shipping:

Product Packaging:

Centrifugal ventilator unit

Installation manual

Mounting hardware

Shipping:

Shipping will occur within 3-5 business days of order placement

Standard shipping rates apply

Shipping carrier and tracking information will be provided

International shipping may incur additional fees and longer delivery times

The product will be shipped via a reliable courier service and a tracking number will be provided to the customer as soon as the product is dispatched.

FAQ:

Q: What is the brand name of this centrifugal ventilator?

A: The brand name of this centrifugal ventilator is Aipu.

Q: Where is this centrifugal ventilator made?

A: This centrifugal ventilator is made in China.

Q: What certifications does this centrifugal ventilator have?

A: This centrifugal ventilator has CE, CCC, SABS, TUV, and RoHS certifications.

Q: What is the price of this centrifugal ventilator?

A: The price of this centrifugal ventilator is negotiable.

Q: What are the packaging details and delivery time for this centrifugal ventilator?

A: The packaging details for this centrifugal ventilator are standard export package. The delivery time is 6-8 workdays.
