

Customizable Magnetic Levitation Blower for Your Business Needs Flow Range 20-400m³/min

Our Product Introduction

for more products please visit us on aipukqdl.com

Basic Information

- Place of Origin: China
- Brand Name: Aipu
- Certification: CE CCC SABS TUV RoHS
- Price: Negotiable
- Packaging Details: Standard Export Package
- Delivery Time: 6-8 workdays

Product Specification

- Color: Black
- Voltage: 380V
- Flow Range: 20-400m³/min
- Warranty: 1 Year
- Highlight: customizable magnetic levitation blower, customizable magnetic levitation bearings, 400m³/min magnetic levitation blower

Product Description

Product Description:

This magnetic levitation blower has a voltage range of 380V and a frequency range of 50Hz, and is suitable for most regions in the world. The power supply is electric, which makes it easy to operate and maintain. The black color of the magnetic levitation blower gives it a stylish and professional appearance, making it an excellent addition to any facility.

The magnetic levitation blower can provide a flow range of 20-400m³/min, which means it can easily handle the most demanding ventilation applications. Whether you need to quickly move a large amount of air or maintain a stable flow rate for a long time, this blower is capable of handling it.

In addition to impressive performance, the magnetic levitation blower is also very easy to install and operate. It is equipped with all necessary components and instructions, making it a convenient and worry-free solution to meet your ventilation needs. The design of the magnetic levitation blower is also energy-saving, which means that over time, it can help you save on electricity bills.

If you are looking for a powerful, efficient, and reliable ventilation solution, a magnetic levitation blower is the perfect choice. With its advanced magnetic levitation technology, smooth and quiet operation, and impressive flow range, this magnetic levitation blower is sure to meet all your needs. Why do we have to wait? Order your magnetic levitation blower now and experience its advantages firsthand!

Features:

Product Name: Magnetic levitation blower

Flow Range: 20-400m³/min

Control Type: PLC control

Pressure: 40-150kPa

Typology: Centrifugal blower

Power Source: Electric

This magnetic levitation centrifugal blower uses magnetic levitation technology to manufacture a centrifugal blower that overcomes gravity. The flow range of the magnetic levitation centrifugal blower is 20-400m³/min, which is very suitable for various applications and easy to operate. This magnetic levitation centrifugal blower is powered by electricity and is a reliable and energy-saving option.

Technical Parameters:

Warranty	1 Year
Pressure	40-150kPa
Voltage	380V
Power Source	Electric
Power Consumption	50-400KW
Frequency	50Hz
Typology	Centrifugal blower

This Magnetic Levitation Blower is a Zero-Contact Fan that uses Air Suspension and a Floating Turbine Blower design.

Applications:

The Aipu Magnetic Levitation Blower is perfect for a variety of occasions and scenarios where a powerful and efficient fan is required. Its size of makes it compact and easy to place in any room or space. The black color adds a touch of elegance to any interior design.

The power source for this product is electric, making it easy to use and energy efficient. Its typology as a centrifugal separator allows it to provide a strong and steady airflow. The remote control feature allows for easy control and customization of the fan's settings.

Aipu magnetic levitation blower is an ideal choice for spaces that require quiet and efficient fans. Its zero touch fan function provides a unique and safe experience.

With a delivery time of 6-8 workdays, the Aipu Magnetic Levitation Blower is a reliable and efficient choice for anyone in need of a powerful and innovative air suspension blower. Get yours today and experience the difference!
