

11-2500kW Multistage Centrifugal Blower Manufacturer Ultimate Choice For Industrial Ventilation Needs

Our Product Introduction

for more products please visit us on aipukqdl.com

Basic Information

- Place of Origin: China
- Brand Name: Aipu
- Certification: CE CCC SABS TUV RoHS
- Price: Negotiable
- Packaging Details: Standard Export Package
- Delivery Time: 6-8 workdays

Product Specification

- Motor Power: 11-2500kW
- Specification: MC
- Flow Range: 20-1500m³/min
- Material: Cast Iron
- Type: Centrifugal
- Boost: 19.6-137.2kPa
- Highlight: industrial multistage centrifugal air blower , industrial multistage centrifugal blower manufacturer , 137.2kpa multistage centrifugal air blower

Product Description

Product Description:

The design working frequency of centrifugal blower is 50Hz, suitable for various industries and applications. This fan is easy to install and transport, making it a convenient and efficient choice to meet all your centrifugal fan needs.

The flow rate of multi-stage centrifugal blowers is 20-1500m³/min, which can provide excellent performance and reliability even in the most demanding applications. The high pressure capability of this centrifugal fan makes it very suitable for use in situations where high pressure and high flow are required.

With its centrifugal design, this centrifugal fan is highly efficient and provides excellent performance while using less energy than other types of vacuum pumps. The multi-stage design of the pump also ensures that it operates at maximum efficiency, providing long-lasting performance and reliability.

In short, our multi-stage centrifugal fans are the ideal choice for anyone seeking reliable, efficient, and high-performance fans. With its multi-stage centrifugal design, high pressure capability, and excellent flow rate, this centrifugal fan is highly suitable for a wide range of applications and industries. Why do we have to wait? Contact us immediately to learn more about this amazing product and how it can benefit your business.

Features:

Product Name: Multi stage Centrifugal Blower

Stage: Multi-stage

Flow Range: 20-1500m³/min

Boosting: 19.6-137.2kpa

Specification: MC

Technical Parameters:

Specification	MC
Stage	Multi-stage
Outlet Diameter	DN150-500mm
Inlet Diameter	DN150-600mm
Application	Centrifugal blower
Boost	19.6-137.2kPa
Material	HT250
Motor Power	11-2500kW

This product is a multi-stage centrifugal blower, also known as an MC multi-stage centrifugal blower.

Applications:

Multi stage centrifugal blowers are an ideal choice for many product applications and scenarios. It is commonly used in the food industry to help maintain product freshness by removing air from packaging. Fans are also used in the pharmaceutical industry to ensure that drugs are not contaminated. In addition, it is used in the chemical industry to facilitate the transportation of chemicals from one place to another.

High pressure multi-stage centrifugal fans are also used in manufacturing to help control the environment in production areas. It is used to remove excess heat generated during the manufacturing process, ensuring the high quality of the product. In addition, it is used in the printing industry to remove excess ink and maintain the quality of the final product.

Centrifugal blowers are also used in the automotive industry to help remove smoke generated during the painting process. This ensures that the paint adheres to the surface of the car, making it smooth and glossy. Centrifugal blowers are also used in the construction industry to help remove debris generated during drilling processes.

The price of multi-stage centrifugal blowers is competitive and comes with standard export packaging. The delivery time is 6-8 working days, which facilitates customers to receive the product in a timely manner. Overall, multi-stage centrifugal blowers are a versatile and reliable product suitable for various industrial applications.

Customization:

Support and Services:

Multi stage centrifugal blower products provide excellent performance and reliability for various applications. Our expert team provides technical support and services to ensure that your wind turbine operates at its optimal level. Our services include:

Installation and commissioning

Maintenance and repairs

Performance testing and analysis

Upgrades and retrofits

Training and education

We understand the importance of minimizing downtime and maximizing efficiency, which is why we provide 24/7 support to address any issues that may arise. Our goal is to provide you with the professional knowledge and resources needed to optimize the performance of multi-stage centrifugal blower products.

Packing and Shipping:

Product Packaging:

The multi-stage centrifugal blower is securely packaged in a sturdy wooden box to prevent damage during transportation. The product is also covered with protective foam to provide additional cushioning against any scratches or dents.

Shipping:

Multi stage centrifugal blowers are transported by standard transportation methods. The estimated delivery time may vary depending on the destination and shipping company. After the product is shipped, the customer will receive a tracking number that can be used to track its delivery status.

FAQ:

Q:What is the brand of this multi-stage centrifugal blower?

A: The brand name of this product is Aipu.

Q: Where is this multi-stage centrifugal blower made?

A: It is made in China.

Q: Does this product have any certification?

A: Yes, it has CE, CCC, SABS, TUV, and RoHS certifications.

Q: What is the price of this multi-stage centrifugal blower?

A: The price is negotiable. Please contact our sales team for more information.

Q: What is the packaging and delivery time for this product?

A: The product comes in a standard export package and has a delivery time of 6-8 workdays.
