Heavy Industrial Cast Iron Multi Stage Centrifugal Blower 20-1500m³/min Flow Rate

Our Product Introduction

for more products please visit us on aipukqdl.com

Basic Information

- Place of Origin: China
- Brand Name: Aipu
- Certification: CE CCC SABS TUV RoHS
- Price: Negotiable
- Packaging Details: Standard Export Package
- Delivery Time: 6-8 workdays

Product Specification

- Motor Power: 11-2500kW
- Specification: MC
- Stage: Multi-stage
- Frequency: 50Hz
- Material: Cast Iron
- Boost: 19.6-137.2kPa
- Flow Rate: 20-1500m³/min
- Highlight: cast iron multi stage centrifugal blower,
heavy multi stage blower,
heavy multi stage centrifugal blower

Product Description

Product Description:

Our multi-stage centrifugal blower is designed to improve efficiency and lifespan, providing stable performance at the required pressure. The inlet diameter is DN150mm-600mm, making it easy to install and integrate into existing systems.

Our multi-stage centrifugal blower is designed with the latest technology in mind, aiming to meet the highest standards of quality and reliability. It is highly suitable for a wide range of centrifugal fan applications, including industrial processes, food packaging, and medical equipment.

What sets our multi-stage centrifugal blower apart from the competition is its innovative design and structure. Its characteristic is that multi-stage impellers work together to generate strong flow while minimizing noise and vibration to the greatest extent possible.

Whether you need a multi-stage centrifugal blower for new installation or replacement of an existing fan, our products are the perfect choice. We offer competitive prices and high-quality customer service to ensure your complete satisfaction.

Why do we have to wait? Contact us now to learn more about our high-quality centrifugal blower vacuum pump and how it meets your vacuum pump application needs!

Features:

Product Name: Multi stage Centrifugal Blower

Specification: MC

Frequency: 50Hz

Motor Power: 11-2500kW

Outlet Diameter: DN150-500mm

Keywords: multi-stage blower, multi-stage centrifugal blower, MC multi-stage centrifugal blower

Technical Parameters:

Attribute	Value
Application	Centrifugal blower
Weight	825-23700kg
Boost	19.6-137.2kPa
Flow Range	20-1500m ³ /min
Type	Centrifugal
Inlet Diameter	DN150-500mm
Material	Cast Iron
Frequency	50Hz
Stage	Multi-stage

Applications:

Aipu is a Chinese brand renowned for producing high-quality industrial equipment, offering a multi-stage centrifugal blower that is highly suitable for a wide range of applications. This product has passed CE, CCC, SABs, TUV, and RoHS certifications to ensure its safety and reliability. The price can be negotiated, and the product adopts standard export packaging with a delivery time of 6-8 working days.

Multi stage centrifugal blowers are designed to provide high-pressure airflow with minimal noise and vibration. Centrifugal blowers are very suitable for various industries, including food processing, pharmaceuticals, chemicals, etc. The multi-stage suction pump can handle a flow range of 20-1500m³/min, with an outlet diameter of DN150-500mm.

Aipu multi-stage centrifugal blower is very suitable for applications that require high-pressure airflow, such as pneumatic conveying, vacuum packaging, and vacuum drying. This fan is also an ideal choice for wastewater treatment plants, which can be used for aeration and agitation.

Multi stage centrifugal blowers can also be used in the mining industry for ventilation and dust prevention. This pump can easily handle the high-pressure airflow required for these applications, making it an ideal choice for mining operations.

In the automotive industry, centrifugal blowers are used for various applications such as cooling, heating, and ventilation. Aipu multi-stage centrifugal blower can provide the high-pressure airflow required for these applications, ensuring the efficient operation of automotive systems.

In summary, the Aipu multi-stage centrifugal blower is a multifunctional product that can be used for various applications in different industries. Its high-pressure airflow, low noise and vibration, and reliable performance make it an ideal choice for anyone seeking high-quality fans.

Customization:

Customize Aipu multi-stage centrifugal blowers through our product customization service. Our product is a centrifugal blower with multi-stage centrifugal blower, with a pressure increase of 19.6-137.2kPa. It is powered by an 11-2500kW motor. Our products are manufactured in China and have passed CE, CCC, SABs, TUV, and RoHS certifications.

Our product customization service offers negotiable prices to meet your budget and standard export packaging details, ensuring the safe arrival of your products. We also offer a fast delivery time of 6-8 working days to deliver your products as soon as possible.

Support and Services:

Our multi-stage centrifugal blower is designed and manufactured to provide reliable and efficient operation in various industrial applications. We provide comprehensive technical support and services to ensure that our customers fully utilize their equipment. Our expert team can provide assistance in installation, operation, troubleshooting, and maintenance. We also offer training programs to help operators and maintenance personnel develop the skills and knowledge needed to optimize the performance of multi-stage centrifugal fans. In addition, we also provide spare parts and maintenance services to minimize downtime and ensure smooth operation for our customers.

Packing and Shipping:

Product Packaging:

The multi-stage centrifugal blower vacuum pump will be safely packaged in a sturdy wooden box to prevent damage during transportation.

The fan will be wrapped with bubble wrap to provide additional protection.

All necessary accessories and components will be included in the package.

A user manual will be included to guide customers on how to install and operate the fan.

Shipping:

The fan will be shipped via a trusted courier service within 1-2 business days of receiving the order.

The estimated delivery time will depend on the customer's location and chosen shipping method.

After the wind turbine is shipped, the customer will receive a tracking number so that they can track the order.

If there are any issues with the delivery, customers can contact our customer service team for assistance.

FAQ:

Q1: What is the brand name of this product?

A1: The brand name of this product is Aipu.

Q2: Where is this product manufactured?

A2: This product is manufactured in China.

Q3: What certifications does this product have?

A3: This product has the following certifications: CE, CCC, SABS, TUV, and RoHS.

Q4: What is the price of this product?

A4: The price of this product is negotiable.

Q5: What are the packaging details and delivery time for this product?

A5: The packaging details for this product are standard export package. The delivery time for this product is 6-8 workdays.
