

Mobile Screw Air Compressor 0.5-2.5Mpa Diesel/Electric 50-400HP

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Aipu
- Model Number: LG/KS
- Minimum Order Quantity: 1PC
- Price: negotiable
- Packaging Details: container
- Delivery Time: 10
- Payment Terms: tt
- Supply Ability: 10t/y

Product Specification

- Exhaust Pressure: 0.5-2.5Mpa
- Displacement: 2.4-65m³/min
- Type: Mobile Screw Air Compressor
- Power Source: Diesel Engine/electric Motor
- Diesel Engine Power: 50~400 HP
- Motor Power: 37-355kW
- Highlight: **Mobile diesel air compressor 50-400HP,
Electric air compressor 0.5-2.5Mpa,
Portable screw air compressor with warranty**

Product Description

Product Description:

Aipu mobile screw air compressor is an efficient and durable air compression equipment designed specifically for complex working conditions such as field operations, mining, and construction. Adopting advanced screw host technology and intelligent control system, it has the characteristics of energy saving, high efficiency, convenient mobility, stability and reliability, meeting the needs of different industries for compressed air.

LG series:

SKY patented screw host

Patent rotor profile, highest efficiency, heavy-duty design, SKY bearings, direct drive, energy-saving principle, innovative design

Dedicated engine with strong power

Equipped with heavy-duty specialized diesel engines such as Yuchai and Cummins, it achieves the best combustion state throughout the entire engine operation range, making the product more reliable, powerful, and fuel-efficient.

Multiple air filtration system

Effectively preventing the impact of harsh dust environments on the engine, the precision filter layer of the main air filter filters out the remaining dust to ensure that the machine does not wear out; The safety filter element allows the machine to perform air filter maintenance without stopping, ensuring safe operation of the machine.

Efficient cooling system

The design of independent oil, water, and air coolers combined with large-diameter fans is suitable for both cold and hot climates

Three heavy oil gas separation system

Reduce the impact of excessive or insufficient oil injection into the separator on the oil content of compressed air, and always maintain the oil content of compressed air below 3ppm. Clean compressed air is beneficial for the safe operation of equipment.

Low temperature start-up system (optional)

The water pump of the fuel heater draws the coolant from the engine block to the heat exchanger, and the oil pump draws the fuel from the tank to the burner for combustion. Through the continuous circulation of heat, the temperature of the coolant and the lubricating oil of the whole machine is continuously increased, ensuring the starting performance of the diesel engine in cold and high-altitude environments.

Remote start stop, monitoring, and positioning system (optional)

Product Features:

Efficient and energy-saving

Adopting Kaishan's independently developed screw host, it has high volumetric efficiency, excellent specific power, and meets national energy efficiency standards.

The intelligent control system can automatically adjust the speed according to the gas demand, reducing energy consumption.

Strong power

Equipped with a well-known brand diesel engine or electric motor (optional), it has strong power and is suitable for harsh environments such as high altitude and high temperature.

The diesel engine model meets the National III/IV emission standards and is environmentally friendly and energy-saving.

Mobile convenience

Integrated trailer design, towing or self loading structure, suitable for frequent transition operations.

Heavy duty tires/anti-skid chassis, suitable for rough terrain.

Stable and reliable

Strengthen the steel structure chassis to prevent shock, dust, and corrosion, and extend the service life of the equipment.

Multiple protection systems (overload, high temperature, low pressure, etc.) ensure safe operation.

Low maintenance cost

The screw host is designed with a long lifespan and a long maintenance cycle.

External oil and air filters for easy maintenance.
