

JN Series Micro Oil Screw Air Compressor 55-355kW 0.5-1.25Mpa

Our Product Introduction

for more products please visit us on aipukqdl.com

Basic Information

- Place of Origin: China
- Brand Name: Aipu
- Model Number: JN
- Minimum Order Quantity: 1PC
- Price: negotiable
- Packaging Details: container
- Delivery Time: 10
- Payment Terms: tt
- Supply Ability: 10t/y

Product Specification

- Exhaust Pressure: 0.5-1.25Mpa
- Displacement: 13.7-92.6m³/min
- Type: Micro Oil Screw Air Compressor
- Power Source: Electric
- Motor Power: 55-355kW
- Highlight: **Durable Air Compressor,
Affordable Small Air Compressor**

Product Description

Product Description:

The JN series air compressor is an efficient and energy-saving screw type air compressor, mainly designed for the stable air source and energy-saving needs in the industrial field. Adopting permanent magnet frequency conversion or power frequency drive technology, matched with independently developed screw host, significantly reduces energy consumption and meets the national first level energy efficiency standard. Suitable for medium to high load conditions in manufacturing, mining, construction, etc., providing continuous and stable compressed air.

Core advantages:

Excellent energy efficiency

The JN screw air compressor, designed by dozens of technicians from the Seattle North American R&D center with the patented "Y" line as its core, has achieved international leading performance and provides more reliable energy-saving and environmental protection solutions for various industries, shaping a model of energy conservation and emission reduction in the industry.

Core technology

JN two-level series host

Compared to Level 2 energy efficiency products, Level 1 energy efficiency saves 10-15% of electricity, and the JN two-stage series achieves Level 1 energy efficiency from 75KW to 630kW.

Energy saving principle

By using a two-stage compression host and two sets of SKY screw rotors of different sizes, reasonable pressure distribution is achieved, thereby reducing the compression ratio.

Characteristics of low compression ratio

Reduced internal leakage and improved volumetric efficiency

Greatly reducing the load on the bearings, improving their lifespan, and extending the lifespan of the main engine

12'3' is an isothermal compression process

123 is the first level compression process

122'3 is a two-stage compression process

The green part is the energy-saving part

Compared to single-stage compression, two-stage compressors are more inclined towards isothermal compression, saving power of 2'-33 "area compared to one-stage compression

Efficient intake valve

National patented intake valve

Through 5 million cycles of life testing

Large caliber, low pressure drop

The check valve closes quickly to prevent oil and gas from spraying out of the main engine

Special motor

High starting torque

Multiple specifications of motors available for selection

SKF bearings have low noise and long service life

Equipped with refueling device, refueling can be done without stopping the machine

Customized display and control integrated touch screen

High definition touch screen display

Friendly and intuitive interface, user-friendly menu structure design, easy to query and maintain

Can display multiple lines of running parameters and historical records

Cooling system

Low power consumption and low noise

Efficient axial flow cooling fan

Adopting intake and exhaust noise reduction design

Product Selection Table:

JN two-stage electric solid series

Model	Exhaust pressure (Mpa)	Exhaust volume (m ³ /min)	Motor Power (KW)	Exhaust interface	Weight (kg)	External dimensions(mm)

Applications:

(1) Manufacturing industry

Automotive/component manufacturing: used for spraying, assembly, pneumatic tools, stamping and other processes.

Electronic appliances: circuit board cleaning, injection molding, precision instrument processing.

Textile industry: Airflow spinning, weaving machine power, printing and dyeing equipment.

(2) Engineering and Architecture

Mining: Drive equipment such as rock drills and pneumatic picks.

Construction: Provide compressed air for concrete spraying and pile foundation engineering.

Road maintenance: Use in conjunction with tools such as breakers and rollers.

(3) Chemical/Energy

Petrochemical industry: pipeline blowing, instrument control, gas transportation.

Power industry: Instrument gas supply and equipment maintenance for power plants.

(4) Food and Medicine

Food packaging: filling, labeling, sterile air supply.

Pharmaceutical industry: drug drying, fermentation tank ventilation (requires oil-free models).

(5) Other industrial scenarios

Metallurgical industry: blast furnace injection, metal smelting.

Wood processing: pneumatic nail gun, wood drying.

Support and Services:

Our Micro oil screw air compressor product comes with comprehensive technical support and services to ensure that our customers are satisfied with their purchase. Our team of experts is available to provide assistance with installation, operation, and maintenance of the product. We also offer repair and replacement services for any faulty parts or components. Additionally, we provide training and educational resources to help our customers maximize the performance and lifespan of their Micro oil screw air compressor.

Packing and Shipping:

Product Packaging:

The Micro oil screw air compressor comes in a sturdy cardboard box with the product image and specifications printed on the outside.

Inside, the product is securely packaged with foam inserts to prevent any damage during transportation.

Shipping:

We provide transportation services for micro oil screw air compressors worldwide. Our standard shipping time is 3-5 business days. For expedited shipping, please contact our customer service team. We ship via trusted carriers such as UPS, FedEx, and USPS and provide a tracking number for your convenience.

FAQ:

Q: What is the brand name of this product?

A: The brand name of this product is Aipu.

Q: What is the model number of this product?

A: The model number of this product is Micro oil screw air compressor.

Q: Where is this product made?

A: This product is made in China.

Q: Does this product have any certifications?

A: Yes, this product is certified by ce.ul.

Q: What is the minimum order quantity for this product?

A: The minimum order quantity for this product is 1pc.

Q: Is the price of this product negotiable?

A: Yes, the price of this product is negotiable.

Q: What is the packaging details for this product?

A: The packaging details for this product is container.

Q: How long is the delivery time for this product?

A: The delivery time for this product is 10 days.

Q: What are the payment terms for this product?

A: The payment terms for this product is tt.

Q: What is the supply ability of this product?

A: The supply ability of this product is 10000t/y.
